California Science and Technology University (CSTU) is a student-centered and career-oriented university that provides quality education in cutting-edge technologies and modern management science.

CSTU Introduction

CSTU is conveniently located in Silicon Valley, the technology center of the United States which provides ample employment opportunities for our graduates. To meet the high demand of the job market in Silicon Valley, CSTU focuses on Computer Science and Business Administration. Students can enroll in the Master of Science in Computer Systems and Engineering (MSCSE) or Master of Business Administration (MBA) in Data Science degree program.

International Student Benefits

International students will be granted a work permit (OPT) for three years after graduation. Those with children will be able to attend a public school free of charge. Silicon Valley's diverse culture provides a friendly environment for international students to settle in. If you are interested in building a career in Silicon Valley, studying at CSTU is a perfect starting point!

The right university for you

High Job Placement Rate

Up-to-Date Courses

Student-Centered Learning

Cost-Effective Programs

High Job Placement Rate

CSTU distinguishes itself from traditional universities with a curriculum that is closely related to the job market. All professors at CSTU have extensive industrial experience, and CSTU's curriculum is updated every year according to market trends. CSTU also partners with many companies to provide internships to enhance students' working experience. Benefiting from the practical curriculum, geographical advantages, and corporate partnership, the employment rate of CSTU graduates is far above the average of US universities. For career-minded students, CSTU is an ideal choice for you!

Up-to-Date Courses

The latest technology is based on artificial intelligence, and modern management relies on data. CSTU's MSCSE focuses on artificial intelligence, and its MBA focuses on data science. To learn cutting-edge technologies and modern management science, CSTU is the right place for you!

Student-Centered Learning

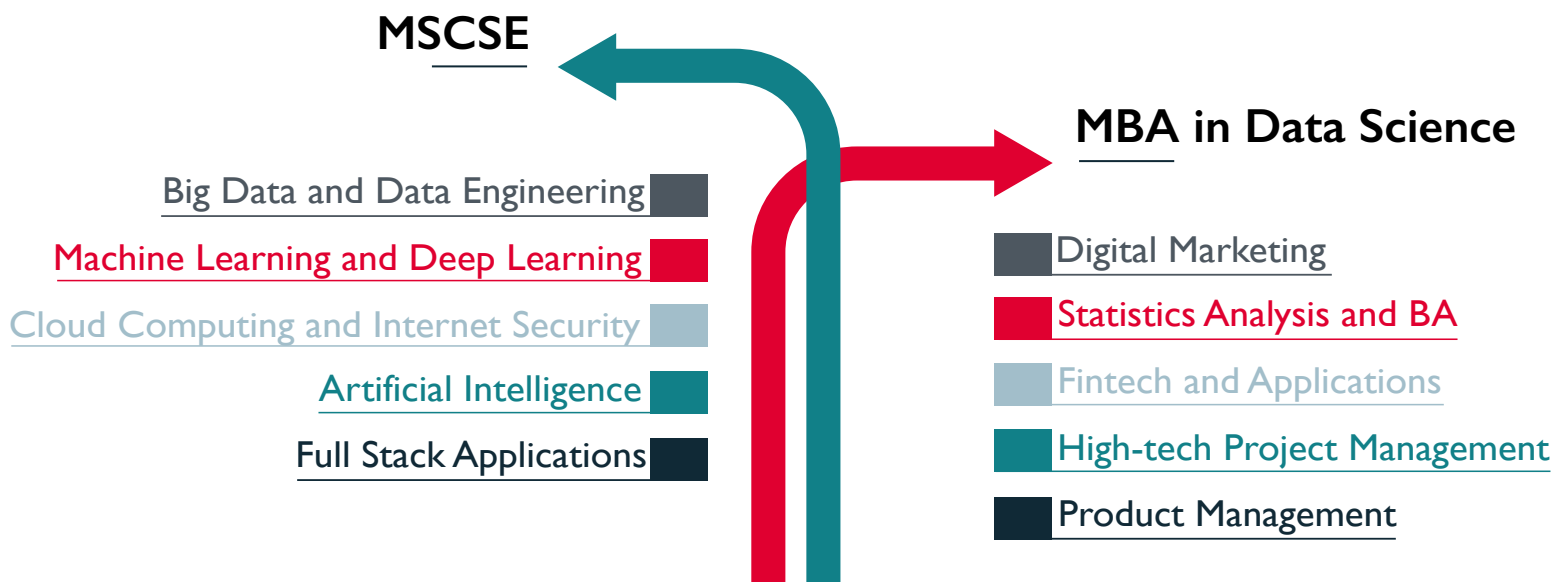

CSTU is a student-centered private university where each student gets special attention in our small class environment. The recent student survey by the accreditation agency shows students' overall satisfaction exceeded 98%. Our student-centered learning policy ensures a high student satisfaction rate. CSTU also offers special scholarships for students' future learning after their graduation. Learning at CSTU is a lifetime benefit!

Cost-Effective Programs

Our high efficiency enables us to provide high-quality teaching at lower tuition compared to that of public universities. For students with a family, your children are eligible to attend top K-12 public schools for free. It's a cost-effective choice for your family to get high quality education in Silicon Valley. To upgrade your career and change your life, come to Silicon Valley and join us at CSTU!
